old   1: select 'Type Specified: ',lower(nvl('&&report_type','html')) report_type from dual
new   1: select 'Type Specified: ',lower(nvl('html','html')) report_type from dual

Type Specified:  html
```

Check awr report

```
[oracle@localhost admin]$ find / -name "awr*.html" 2>/dev/null
/u01/app/oracle/product/19.0.0/dbhome_1/rdbms/admin/awrrpt_1_24_25.html
[oracle@localhost admin]$
```

Move the awr report to desktop location.

```
[oracle@localhost u01]$ mv awrrpt_1_24_25.html ~/Desktop
[oracle@localhost u01]$
```

PRACTICAL

SQL> @awrrpt.sql

Specify the Report Type

~~~~~

AWR reports can be generated in the following formats. Please enter the name of the format at the prompt. Default value is 'html'.

'html'      HTML format (default)

'text'      Text format

'active-html' Includes Performance Hub active report

Enter value for report\_type: 2

old 1: select 'Type Specified: ',lower(nvl('&&report\_type','html')) report\_type from dual

new 1: select 'Type Specified: ',lower(nvl('2','html')) report\_type from dual

Current Instance

| DB Id        | Inst Num | DB Name | Instance | Host         |
|--------------|----------|---------|----------|--------------|
| -----        | -----    | -----   | -----    | -----        |
| * 1762998967 | 1        | ORCL    | orcl     | localhost.lo |

Specify the number of days of snapshots to choose from

~~~~~

Entering the number of days (n) will result in the most recent (n) days of snapshots being listed. Pressing <return> without specifying a number lists all completed snapshots.
