

ASH REPORT

✓ ASH REPORT ANALYSIS

ASH (AUTOMATIC SESSION HISTORY)

An **ASH Report** is a performance diagnostic report that shows information about **active database sessions** sampled every second. It helps DBAs analyze:

- High CPU usage
- Wait events
- SQL performance issues
- Session activity
- Blocking sessions
- Performance bottlenecks during a specific time period

ASH REPORT LOCATION

\$ORACLE_HOME/rdbms/admin

Specify the Report Name

The default report file name is ashcpt_1_0613_1250.html. To use this name, press <return> to continue, otherwise enter an alternative.

Enter value for report_name: /u01/ashcpt

Using the report name /u01/ashcpt

Summary of All User Input

Format: HTML

DB Id: 1762998967

Inst num: 1

Begin time: 13-Jun-26 12:10:55

End time: 13-Jun-26 12:50:55

Slot width: Default

Report targets: 0

Report name: /u01/ashrpt
