

USER PERMISSION CLONING FOR ONE USER ANOTHER NEW USER

Oracle Database Administrative Execution Reference Document

HR system privilege

```
select GRANTEE, PRIVILEGE, ADMIN_OPTION from dba_sys_privs where GRANTEE='HR';
```

GRANTEE	PRIVILEGE	ADM
HR	CREATE DATABASE LINK	NO
HR	ALTER SESSION	NO
HR	CREATE VIEW	NO
HR	UNLIMITED TABLESPACE	NO
HR	CREATE SESSION	NO
HR	CREATE SEQUENCE	NO
HR	CREATE SYNONYM	NO

HR object level privilege

```
select grantee, privilege, table_name, owner, grantor from dba_tab_privs where grantee like 'HR';
```

GRANTEE	PRIVILEGE	TABLE_NAME	OWNER	GRANTOR
HR	EXECUTE	DBMS_STATS	SYS	SYS

HR role privilege

```
select grantee, granted_role from dba_role_privs where grantee like 'HR';
```

GRANTEE	GRANTED_ROLE
HR	RESOURCE

Create a new user

```
create user jerry identified by oracle default tablespace users quota unlimited on users; col  
username for a10; select username from dba_users where username='JERRY';
```

Create a script file (user_privs.sql)

```
set echo off set heading off set underline off set feedback off set verify off set pagesiz 0 spool  
/home/oracle/john.sql select 'grant ' || privilege || ' to JERRY;' from dba_sys_privs where grantee like  
'HR'; select 'grant ' || privilege || ' on ' || owner || '.' || table_name || ' to JERRY;' from  
dba_tab_privs where grantee like 'HR'; select 'grant ' || granted_role || ' to JERRY;' from dba_role_privs  
where grantee like 'HR'; spool off set echo on set heading on set underline on set feedback on set verify  
on set pagesize 100 @/home/oracle/john.sql select grantee, privilege from dba_sys_privs where grantee like  
'JERRY'; select grantee, owner, table_name, privilege from dba_tab_privs where grantee like 'JERRY';  
select grantee, granted_role from dba_role_privs where grantee like 'JERRY';
```

Run the script

```
@/u01/user_privs.sql
```
